

THE AVON VALLEY SCHOOL & PERFORMING ARTS COLLEGE

13th October 2025

Dear Parent/Carer,

We are pleased to let you know that Year 11 students now have access to Sparx Maths, an online platform designed to support personalised revision in mathematics.

What is Sparx Maths?

Sparx Maths provides tailored practice activities matched to each student's current level of understanding. It offers instant feedback and adaptive questions that help students strengthen key skills and revise effectively for their GCSE exams.

How will Year 11 use Sparx?

For Year 11, Sparx Maths is being made available as an optional revision tool to support independent study and exam preparation. Students are encouraged to use it to target areas for improvement and practise regularly, but it is not compulsory and not part of their set homework.

Because Sparx Maths is designed primarily as a homework platform, you may receive automated emails referring to "homework." Please note that for Year 11, this simply reflects any optional revision work your child chooses to complete - it does not mean that teachers have set this as formal homework.

Why are we offering Sparx Maths to Year 11?

We want to give students access to high-quality tools that help them:

- revise topics at the right level for them,
- identify and close knowledge gaps,
- gain confidence with exam-style questions, and
- build consistent revision habits ahead of their GCSEs.

We hope students find Sparx Maths a useful addition to their revision toolkit.

If you have any questions about Sparx Maths or how it can support your child's learning, please do not hesitate to contact us.

Yours faithfully,

Mr Patton
Assistant Faculty Leader of Maths
